RE: SFI Certification

Dear fellow employees:

Starfire Lumber is committed to sustainable business and forestry practices. We believe it is part of our corporate and social responsibility to procure raw materials in a sustainable way. With our continuing commitment to the Sustainable Forestry Initiative® (SFI®) program, we will continue to certify our wood fiber procurement and chain of custody system according to its strict standards.

In addition, we have taken the necessary steps to carry an SFI label on our products, which will make them more appealing to green building customers. We will undergo independent third party audits to assure that our procurement and chain of custody systems comply with the SFI standards.

For those of you not familiar with SFI, it is a comprehensive set of principles, objectives, performance measures, and indicators that promote sustainable management. You can learn more about SFI by visiting:

<http://www.sfiprogram.org>.

The responsibility to promote and communicate the benefits of SFI rests with each employee. Thank you for your willingness and dedication to help us with this important responsibility.

Very truly yours,

Foster "Robbie" Robinson
President and Chief Executive Officer
